The safety tool specialists know just how and what to deliver to make electric safety work practices even stronger!

MRT-18-LED

Introducing our rechargeable LED light up magnetic retrieving tool! This tool features an 18" flexible shaft combining a strong magnetized tip with a rechargeable LED light at the tip.

This light-up tool is deceptively strong and designed to eliminate the need for a light to be on your head, in your mouth or in your hand...it lights exactly where you are looking for that lost screw, nut or tool that might fall inside a panel.

Did we mention it is RATED? You can use it anywhere with its 1000V AC / 1500V DC rating.

- Light provides a well-balanced beam with its 5-sided glowing CSP LED and easily twists off and on
 - o Max output of 150 Lumens - Fully tighten tail cap to access
 - 15 mins before dropping to 50% of charge
 - o Low output of 5 Lumens – Slightly tighten tail cap turn to access
 - 6 hours before dropping to 50% of charge
- Insulation cap and Magnet tip remove to allow full recharge in 75 minutes with
 - o Fully loosen tail cap to expose Micro-USB charger port (cord included)
